

Completing Your Flight

After landing, taxi to your parking spot and stop. Once you do that, your flight officially ends.

Take a moment to review your ACARS **Flight Log** *before* filing it. Details about doing that can be found **here**.

File your **Flight Log**.

After doing so, a PIREP for your flight will be automatically completed and saved to your **Logbook**.

It'll be categorized as being **Approved**, **Rejected** or **Diverted** based on the criteria noted below.

*If you did **not** land at your planned Arrival Airport, your flight will be categorized as being **Diverted**.*
