

Downloads – Liveries

When flying for the Company using ACARS, all aircraft are to be flown in Company 'colors' unless you are a member of the Patreon program.

Custom-designed, company-branded liveries for all Fleet aircraft can be found *and* downloaded here.

Smarter Browsing & Filtering

Finding the right livery is now faster and more intuitive than ever. You can filter aircraft by:

- **Simulator** (MSFS 2020, MSFS 2024, Prepar3D, X-Plane)
- **Aircraft type** (Jet, Turboprop, Piston, Helicopter)
- **Operations** (Cargo, Charter, Scheduled)
- **Liveries, Mods, Favorites, and Type-Rated aircraft**
- **Recently Updated** items, so you never miss what's new

Filters update results instantly, making it easy to narrow down exactly what you're looking for.

At-a-Glance Fleet Stats

At the top of the page, you'll now see live statistics showing:

- Total aircraft available
- How many aircraft are currently displayed based on filters
- Total liveries in the system
- Recent livery updates

This gives you a quick snapshot of the depth and activity of the WAT fleet.

Improved Aircraft Cards

Aircraft cards have been refined for clarity and consistency:

- Clear aircraft identification and ICAO tags
- Visual indicators for simulator support and operations
- Easy access to available liveries per aircraft
- Favorites and Type-Rated badges where applicable

Everything you need is visible without extra clicks.

Livery Update Notifications

For staff, we've added tooling to support **Discord livery notifications**, including optional change logs. This helps keep the community informed when:

- New liveries are released
- Existing liveries are updated with improvements or fixes

Revision #6
