

Downloads – Modlinks

Modlinks is a Community-driven database containing links to all kinds of things a Pilot may find useful when flying for the Company.

This is a community-driven database of links to all kinds of things: aircraft, plugins, scenery, simBrief profiles, and more.

If you wish to add to the database simply click the  Add button below.

If you wish to edit your added items, click the  icon on the row of your item to edit.

 We check the URL you are attempting to submit for duplication; if one exists we will not let you enter it.

 Pilots who post links to piracy websites will be banned as outlined in our operations manual.

Category Choices

- **Aircraft** - freeware, payware, or mods that pertain specifically to aircraft.
- **Little Navmap** - profiles for aircraft.
- **Other** - anything not covered in the categories here.
- **Plugins** - all plugins and plugin-like applications.
- **Scenery** - airports, regions, orthos, visual enhancements.
- **simBrief** - custom airframes for aircraft.
- **Software** - stand-alone applications.

This is a **Single Row** view (so detail can be seen)...
