

Flights – Search

This search feature provides details about what flights are available in our **Cargo** and **Scheduled Operations** – individually *and* collectively.

You cannot bid on a flight from here.

To begin, at the top of your screen, select a Flight Operation – All , Cargo or Scheduled .	<input type="text" value="All"/> Flight Operation
Select a Departure Airport	<input type="text" value="Type a departure airport..."/> Departure Airport
Select an Arrival Airport by entering its name or ICAO Code.	<input type="text" value="Type an arrival airport..."/> Arrival Airport

Let's use our previous example of looking for **Cargo** flights from *KDEN | Denver International Airport* to *KMSP | Minneapolis-St. Paul International Airport*.

<input type="text" value="Cargo"/> Flight Operation	<input type="text" value="KDEN - Denver International Airport"/> Departure Airport	<input type="text" value="KMSP - Minneapolis Saint Paul International Airport"/> Arrival Airport
--	---	---

After completing your final entry, the System will search the database for flights meeting this criteria – and it may take a few moments to return flight options to you. As you can see in the lower left of the screen, there are over 640,000 entries in the database!

The list of available flights will then appear. Each column in that list **is** sortable to help you decide which flight to fly.
