

Pilot Profile – Settings >

Aircraft Settings

In this section, you have the ability to customize your **Aircraft Settings** for our platform.

You can choose from the following items:

- **Favorite:** If you want an aircraft to be at the top of the drop down selector, click the checkmark. The next time you place a bid in any of our modules, or events, you will see a list of your favorite's at the top followed by the remaining aircraft in that fleet.
- **Max Cargo:** All aircraft in our fleet have a maximum cargo load defined. This is usually the absolute maximum that the aircraft can take based on information readily available. You have an option now to select a number, up to the maximum we have defined, as a new maximum just for you. What number you put in this box will impact your load calculation in the pilot briefing and also for our simBrief OFP generator.

If you have our website configured to use Kilograms (KGS), please enter the value as KGS. We will properly store the value in our database accordingly.

- **Max Passengers:** All aircraft in our fleet (minus Cargo) have a maximum passenger load defined. This is usually the absolute maximum that the aircraft in particular can take without any cabin layout modifications. You have an option now to select a number, up to the maximum we have defined, as a new maximum just for you. Think of this like a cabin-class configuration. What number you put in this box will impact your load calculation in the pilot briefing and also for our simBrief OFP generator.
- **simBrief Custom Airframes:** This allows you to provide a custom aircraft frame ID from SimBrief, or a fellow pilot, and use the 'Generate SimBrief' option in the Pilot Briefing. If you choose to keep these values empty we will use the default SimBrief aircraft values (if available.) Simply copy and paste the Internal ID to the respected aircraft (pay attention to type of operation) and click 'Save SimBrief' at the bottom. If you wish to remove an airframe simply clear the value and save your settings.

CARGO

CHARTER

SCHEDULED

Aircraft	Favorite	Max Cargo	simBrief Airframe
Airbus A300F	<input checked="" type="checkbox"/>	<input type="text"/>	347385_1703262262270
Boeing 737-800BCF	<input checked="" type="checkbox"/>	<input type="text"/>	233512_1661427771220
Boeing 737-800BDSF	<input checked="" type="checkbox"/>	<input type="text"/>	349674_1661390511374
Boeing 747-400F	<input checked="" type="checkbox"/>	<input type="text"/>	
Boeing 747-8F	<input checked="" type="checkbox"/>	<input type="text"/>	
Boeing 767-300F	<input checked="" type="checkbox"/>	<input type="text"/>	
Boeing 777-F	<input checked="" type="checkbox"/>	<input type="text"/>	
McDonnell Douglas MD-11F	<input checked="" type="checkbox"/>	<input type="text"/>	81536_1702556701413
Airbus A300ST	<input type="checkbox"/>	<input type="text"/>	
Airbus A310F	<input type="checkbox"/>	<input type="text"/>	

Save Aircraft Settings

You can cycle through the fleet by clicking the tabs at the top, make your selections, enter your data, and then click **Save Aircraft Settings** button.

*If you do **not** click the **Save Aircraft Settings**, button, your data will **not** be saved.*

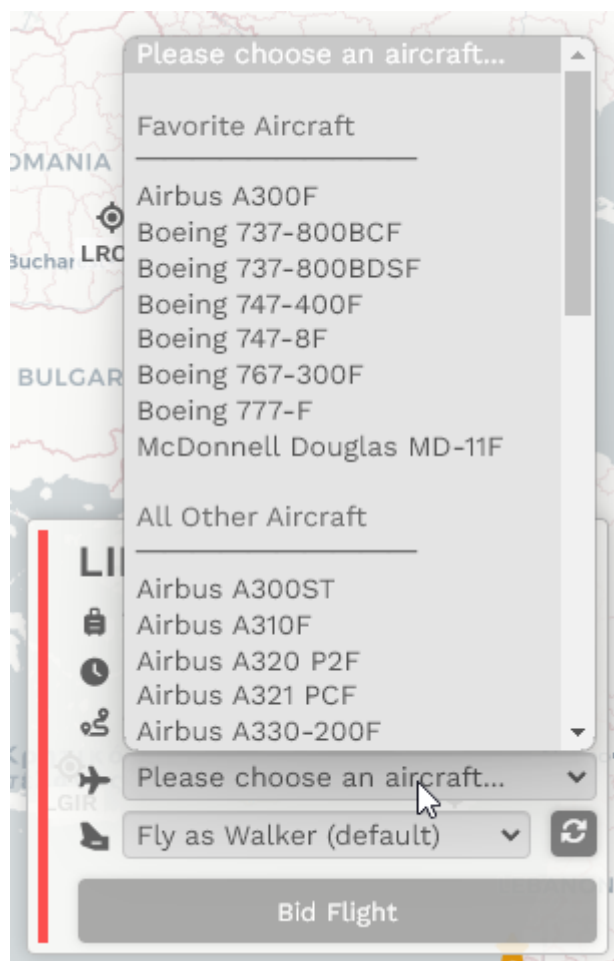

To remove the data, simply uncheck and erase the fields to return to default settings.

Afterwards, click the **Save Aircraft Settings** button.

*If you do **not** click the **Save Aircraft Settings**, button, your change(s) will **not** be saved.*

This is what it looks like when you make a bid for a **Cargo** flight. The aircraft we selected above as **Favorite** is conveniently at the top of the list.

All other aircraft in the **Charter** and/or **Scheduled** Fleets you selected as **Favorite** will appear at the top of the list as well.
