

# Pilot Profile – Settings > My Information

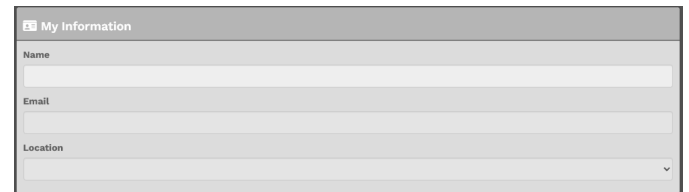

Within this section, you can view a number of personal information items.

## My Information

This section contains your Name, Email Address and Location.

Your name can't be changed. Your Email Address and Location can be changed.

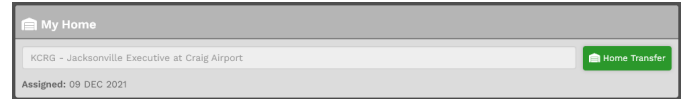

If you make any changes, click the **Save Changes** button at the bottom of the page.

The screenshot shows a form titled "My Information" with three input fields: "Name", "Email", and "Location". The "Name" field is a text input, while "Email" and "Location" are also text inputs. The "Location" field has a small downward arrow icon on the right side, indicating it is a dropdown menu.

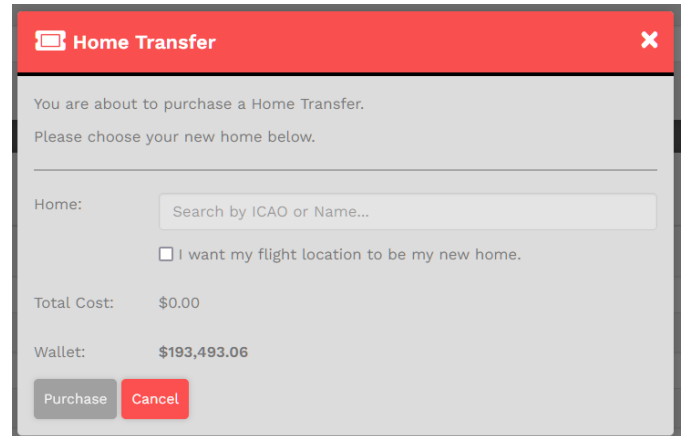

## My Home

This section notes the name of your **Home** and the date it was assigned.

You also have the option to change it.

To do so, click the **Home Transfer** button, opening the screen below.

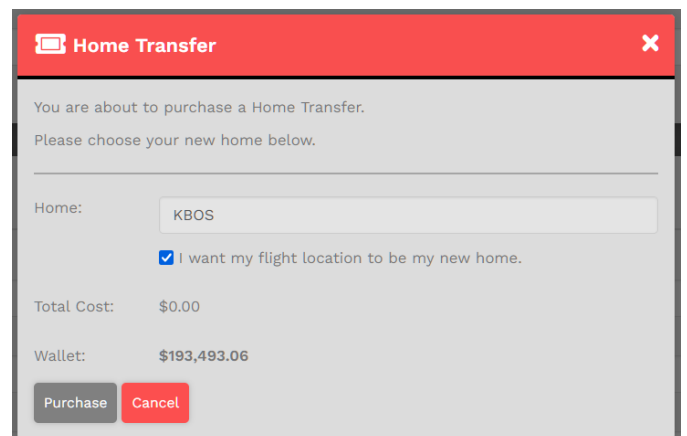

Let's use an example to see how this works...

**EXAMPLE:** Your current Home is *KTIW | Tacoma Narrows Airport*. You want to transfer to *KBOS | Boston Logan International Airport*.

In the **Home:** Text Box, enter **KBOS**.

Click the box beside 'I want my flight location to be my new home.'

Afterwards, your screen will look like the one below.

The **Total Cost** of the **Home Transfer** is the amount indicated.

*If the Total Cost is **greater than** the amount of money in the Wallet, the Hub Transfer can't be completed. In this case, that's **not** a problem because the Wallet balance **exceeds** the Total Cost of the Hub Transfer.*

## Online ATC Networks

If you use online ATC Networks – *IVAO*, *PilotEdge* and/or *VATSIM* – enter your credentials in the spaces provided.

### Notice about Maps and PIREPS

To appear on our Maps as flying on an ATC network, and to have your PIREPs reflect the correct network, you must enter your Network ID(s) in your profile.

We do **not** use the "Online Network" selection in ACARS applications (smartCARS 3 or FlightTrackerXP).

If you make any changes, click the **Save Changes** button at the bottom of the page.

By default, pilot callsigns are always tied to their Walker flight number. If you wish to use your Pilot ID as your callsign always, check the box at the bottom.

The screenshot shows a form titled "Online ATC Networks". It contains several input fields for "IVAO", "PilotEdge", and "SayIntentions.AI". Below these are fields for "Discount Code" (with a note "(10% off for being a member.)") and "Dispatch Frequency" (with a note "You must enter your API Key and save it to your profile to see the dispatch frequency."). There is also a "VATSIM" field. At the bottom, there is a section titled "Online ATC Callsigns" with a note: "We do not require pilots to use their Walker Pilot ID as their callsign anymore. However, some pilots do like to do that. If you wish to continuing using your Walker Pilot ID (PID) as your callsign when filing on ATC networks, please click the checkmark below." Below this note is a checkbox labeled "I would like to use my Walker Pilot ID as the callsign for all flights."

*These may be left blank.*

## Social Networks

If you use a Social Network – *Twitch*, *Xbox* and/or *YouTube* – enter your credentials in the spaces provided.

If you make any changes, click the **Save Changes** button at the bottom of the page.

The screenshot shows a form titled "# Social Networks". It features a yellow warning banner that says "Entering your social networks will make them visible to your public profile accessible by pilots." Below this are input fields for "Steam", "Twitch", "Xbox", and "YouTube".

*These may be left blank.*

## Signature

In some online Forums, signature customization is allowed. If it's allowed, a URL is provided here that may be used for that purpose. While using it is **not** mandatory, we appreciate it when you do. The example below is the one created for WAT100.

**Signature**

Our system automatically, each time you submit a PIREP, generates an image that you can use as a forum signature. It would be a great way to help spread news about us and also show fellow simulation enthusiasts that you've joined a great airline!

The URL for your signature is:

<https://crew.walkerair.us/signatures/WAT100.png>

You will want to copy that URL and embed it (check the forum you are on for instructions) as an image. It will then automatically update as you progress through the ranks.

Here is what your signature looks like.

The signature image is a horizontal banner with a dark background. On the left, it says 'WALKER AIR' in white, with 'WALKER AIR US' below it. In the center, it displays 'WAT100 - KORG - Chief Pilot!' in white, with '949 flights - 2375 hours' below it. On the right, there is a small image of a Walker Air aircraft and the text 'Free to Fly'.

To save any changes you made, click the **Save Changes** button.

Revision #9
