

Pilot Profile – Settings > simBrief

If you use *simBrief*, you'll want the ability to import the last Operational Flight Plan (OFP) you created. In order to do so, you must provide your *simBrief* Username. Follow the instructions detailed in the image below.

Enter your *simBrief* **Username** in the *Text Box*.

If this is the only action you want to complete, click the **Save SimBrief** button at the bottom of the page. If you have other actions to complete, though, scroll down to the next section.

*If you do **not** click the **SimBrief** button, the action you completed will **not** appear.*

simBrief Username

If you want the ability to import your last simBrief OFP that you created on their website, you will need to enter your username. Doing this will enable a "Import simBrief OFP" button on the Schedule Briefing.

 Navigraph has forced users to use their Navigraph login in order to access simBrief. You **must** use the *Alias* as the username in the textbox below. You can find that in your Navigraph *Your Account* area--Alias

simBrief Username

As you can see by examining the image below, in this section, a number of Operational Flight Plan variables can be assigned. Make your selections from each item's drop-down menu

If this is the only action you want to complete, click the **Save SimBrief** button at the bottom of the page. If you have other actions to complete, though, scroll down to the next section.

*If you do **not** click the **SimBrief** button, the action(s) you completed will **not** appear.*

Operational Flight Plan

This allows you to choose the type of flight plan and weights you wish to use.

i Website Weights: Keep in mind that the weight you choose to use will be reflected throughout the website.

Plan Format **i**

Extra Fuel: **i**

Taxi In (min) **i**

Taxi Out (min) **i**

ETOPS Planning **i**

Plan Stepclimbs **i**

Include NOTAMS **i**

FIR NOTAMS **i**

As a convenient time-saver when completing OFPs, *simBrief* allows you to create *and* use **Custom Aircraft Frames**. Here, you have the opportunity to enter them for any aircraft in our Fleet - Cargo, Charter and Scheduled.

Select the desired Fleet. Click the down chevron to access the aircraft in that Fleet.

Custom Aircraft Frames

This allows you to provide a custom aircraft frame ID from *SimBrief*, or a fellow pilot, and use the 'Generate *SimBrief*' option in the Pilot Briefing. If you choose to keep these values empty we will use the default *SimBrief* aircraft values (if available.) Simply copy and paste the Internal ID to the respected aircraft (pay attention to type of operation) and click 'Save *SimBrief*' at the bottom. If you wish to remove an airframe simply clear the value and save your settings.

Cargo Operations

Charter Operations

Scheduled Operations

Here is an example of a small portion of the aircraft available in the **Cargo Fleet**. Paste the data for the aircraft you select in the *Text Box* beneath its name. When you've completed all of the entries you desire in the **Cargo Fleet**, click the *up chevron* to collapse the section. Repeat this process to add/edit any entries in the **Charter** and **Scheduled Fleets**.

The manner in which aircraft are listed in each Fleet is the same.

If this is the only action you want to complete, click the **Save *SimBrief*** button at the bottom of the page. If you have other actions to complete, though, scroll up to the sections above.

*If you do **not** click the ***SimBrief*** button, the action(s) you completed will **not** appear.*
