Map

In this section, you can change the appearance of the **Map** on our map-enabled pages.

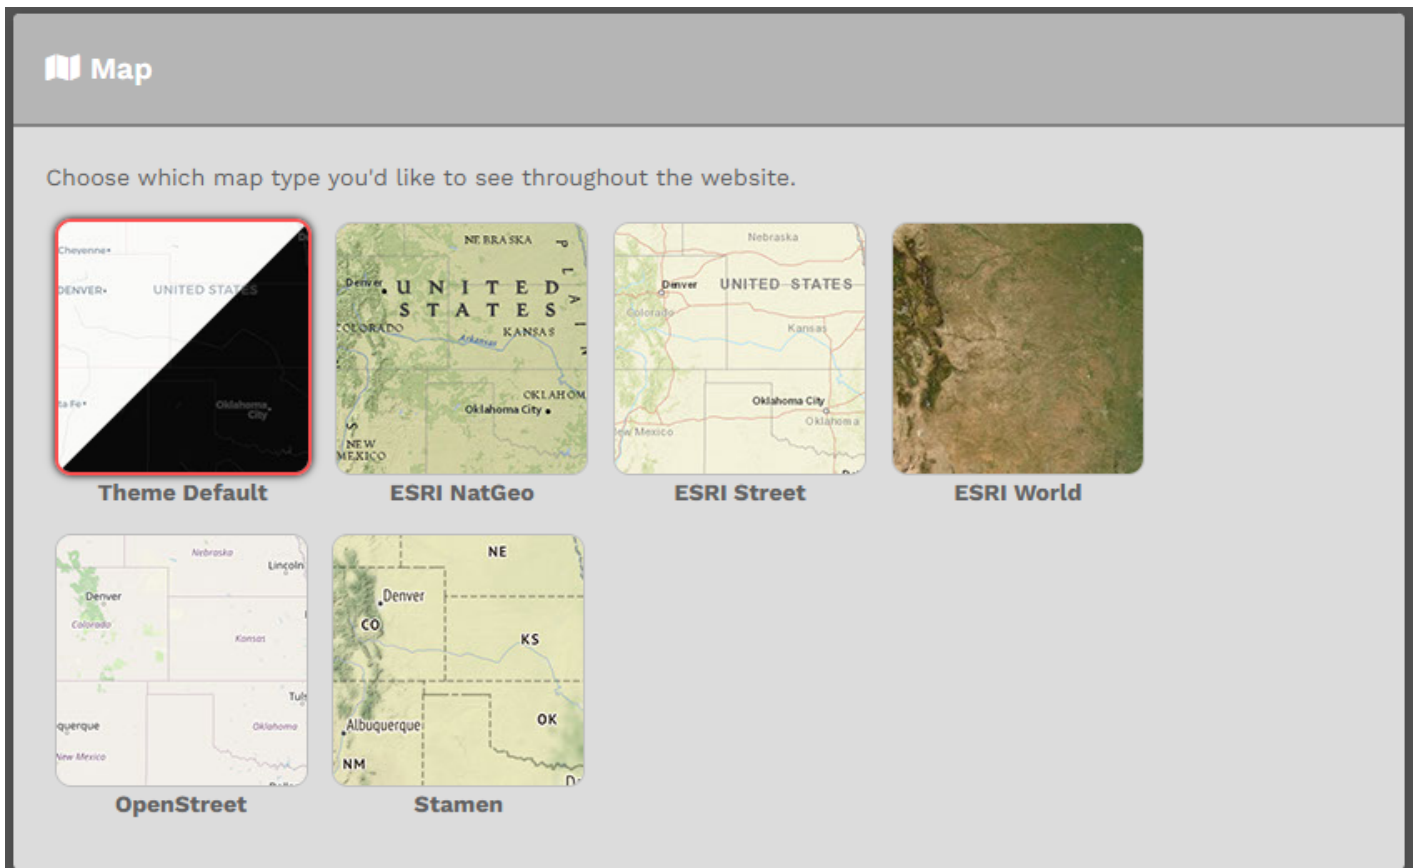

Theme Default will give you a light map or a dark map, depending on the theme you choose, always. If you wish to have a fixed custom map, pick any of the other ones visible and they will persistent regardless of your theme choice.

To activate this option, click the **Save Settings** button at the bottom of the page.

 Save Site Settings

If you do **not** click the **Save Settings** button, your Map Type you selected will **not** appear.

To change your Map Type, return to this section and click on the new Map Type you desire. Afterwards, click the **Save Settings** button.
