

# Reviewing Your PIREP

---

The data produced by your simulator during your flight was transmitted to our *Flight Data System (FDS)* by ACARS.

After receiving and processing it, our *FDS* was able to generate the reports and displays found in your **Logbook**.

To review the PIREP for the flight you just completed, click **here** and follow the instructions it contains.

And just a reminder... Manual PIREPS are **not** allowed.

---

Revision #11
