

# Advanced Mapbox Maps

As a Patreon, you will have access to our Mapbox environment throughtout the website.

Here are some examples of what our maps look like.

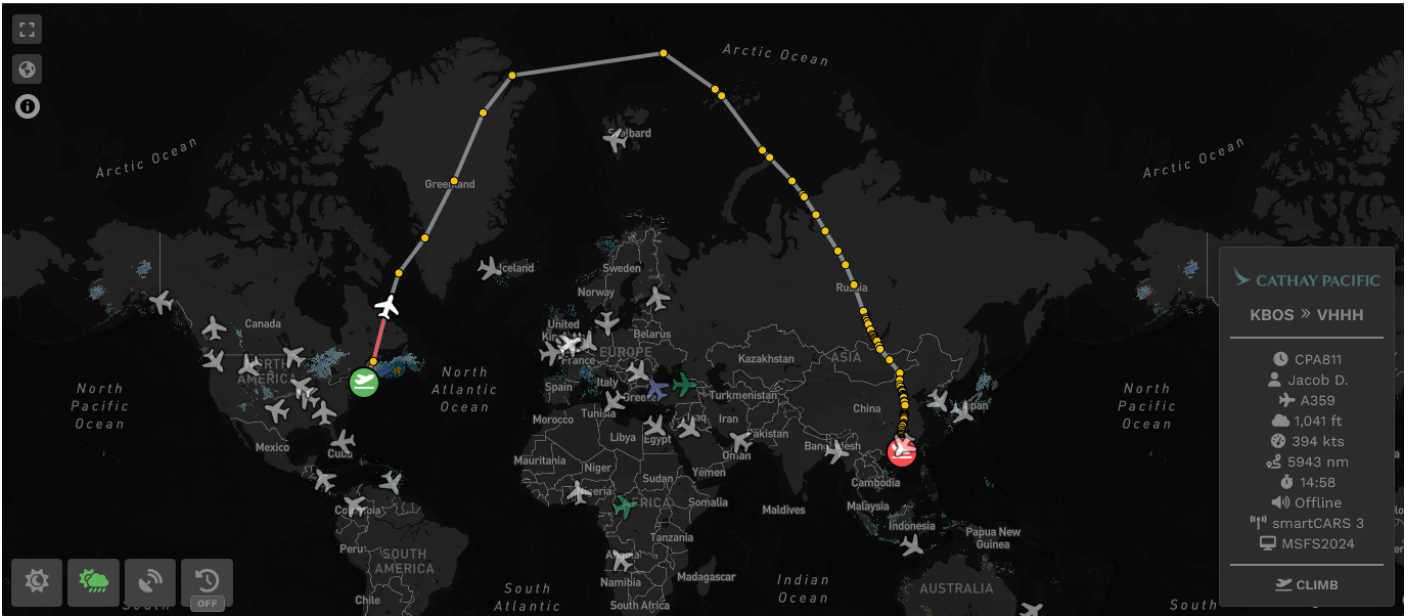

*All our maps have the ability to switch between flat map and globe view.*

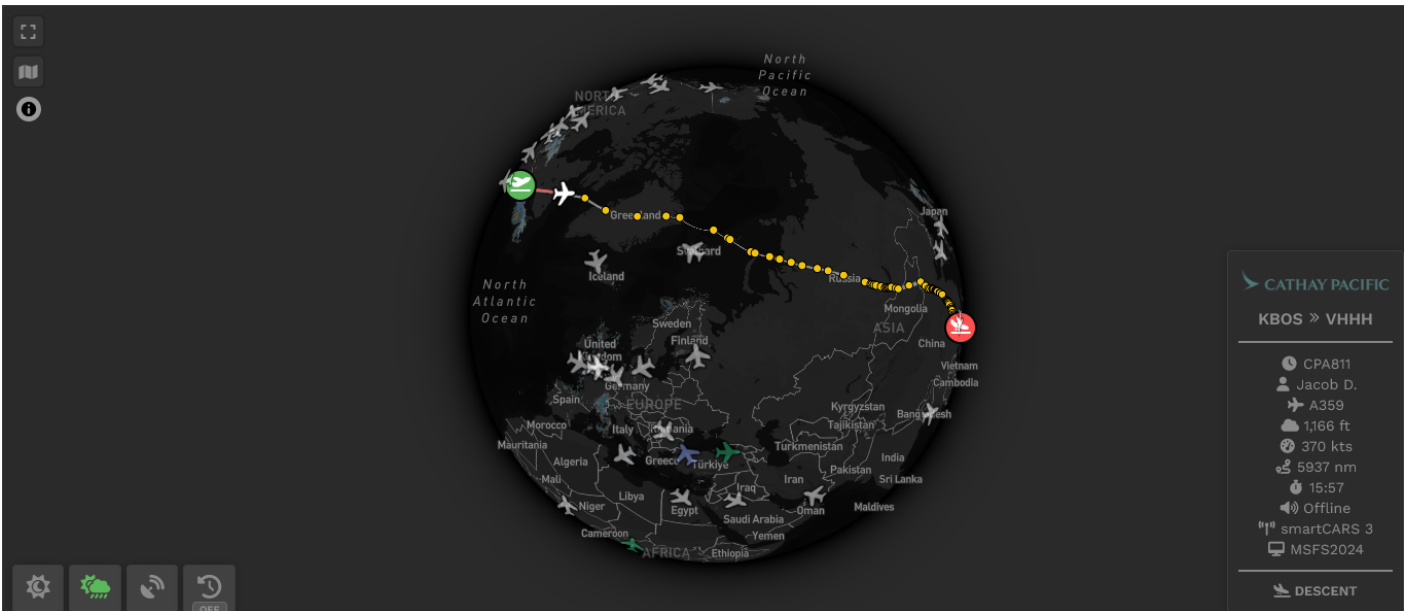

*We implemented deck overlay's to show altitude curtains for your PIREP's using color coding (this is the same tech used in Volanta--Deck.gl allows us to do amazing things with data.)*

*Mapbox allows for true anti-meridian crossing, which is not possible in our current leaflet maps used by non-Subscribers.*

And when you flip to Globe view, you can see exactly how the flight traverses the globe.

Revision #1
