

Worldwide Persistence

What is it?

Worldwide Persistence (WWP) changes your Charter flight experience in our airline.

By enabling it, your charter flight will be treated like our Cargo and Scheduled location persistence. Once you land, your location will be moved to that arrival airport and your next chartered flight must department from there.

***Events** and **Tours** are not affected by Worldwide Persistence, and therefore your location does not move.*

If you enable Worldwide Persistence, you'll experience the following:

- You'll be required to depart from your last arrival airport for all Charter flights.
- The departure airport field in Charter flights will be disabled and show your last arrival airport, whether it was a flight you completed (in Cargo, Charter, or Scheduled) or a Jumpseat you purchased.
- The 'Find a Flight' departure field will be disabled.
- The Jumpseat Airport List will expand to include all 55k+ airports in our database.

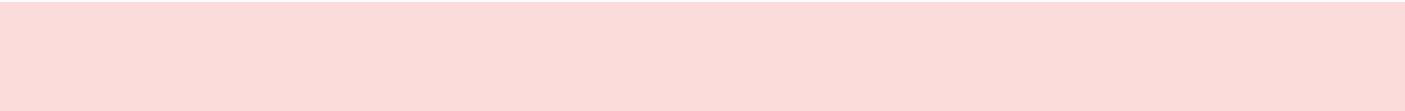

Enable / Disable Option - Within Pilot Settings

You can enable Worldwide Persistence by clicking your name in the top right > Settings > Worldwide Persistence.

To **Enable** this option, click the **toggle** at the bottom of the image. Click the **Save Settings** button at the bottom of the page to save it.

To **Disable** this option, click the **toggle** at the bottom of the image. Click the **Save Settings** button at the bottom of the page to save it.

With Worldwide Persistence...	... what happens?
On Enabled	Your location will be moved if you complete a charter flight, and you will be required to depart from that location next.
Off Disabled	You can department from any airfield in the Charter module.

If you do **not** click the **Save Settings** button, the option you selected – **Enable** or **Disable** – will **not** appear.

The screenshot shows a user interface with a sidebar on the left and a main content area on the right. The sidebar contains several menu items: 'My Information', 'Favorite Aircrafts', 'Patreon', 'simBrief', 'Site Settings', 'Worldwide Persistence' (highlighted in red), and 'Change Password'. The main content area is titled 'Worldwide Persistence'. At the top, there is a yellow information box stating: 'Events and Tours are not affected by Worldwide Persistence, and therefore your location does not move.' Below this, the text explains that Worldwide Persistence (WWP) changes the Charter flight experience. It states that by enabling it, the charter flight will be treated like Cargo and Scheduled location persistence, meaning the user's location will move to the arrival airport for their next flight. A list of consequences for enabling WWP is provided: the departure airport field will be disabled and show the last arrival airport; the Specific Region and Range Generator will be disabled; and the Jumpseat Airport List will expand to include all 43k airports. At the bottom of the main content area, there is a green toggle switch that is currently turned on, with the text 'You have enabled WWP and are now required to depart from your last arrival airport when flying Charter flights.' A 'Save Worldwide Persistence' button is located at the bottom of the page.

Worldwide Persistence

Events and Tours are not affected by Worldwide Persistence, and therefore your location does not move.

Worldwide Persistence (WWP) changes your Charter flight experience in our airline.

By enabling it, your charter flight will be treated like our Cargo and Scheduled location persistence -- once you land, your location will be moved to that arrival airport and your next chartered flight must depart from there.

If you enable Worldwide Persistence, you'll experience the following:

- You'll be required to depart from your last arrival airport for all Charter flights.
- The departure airport field in Charter flights will be disabled and show your last arrival airport, whether it was a flight you completed or a Jumpseat you purchased.
- The Specific Region and Range Generator within the Charter Bid form will be disabled.
- The Jumpseat Airport List will expand to include all 43k airports in our database.

☒ You have enabled WWP and are now required to depart from your last arrival airport when flying Charter flights.

Save Worldwide Persistence

Enable / Disable Option – Within Charter Flight Bid

You may also **Enable** or **Disable** *Worldwide Persistence* when creating a Bid for a **Charter Flight** by clicking the toggle beside the *globe* – as shown in the image below.

With Worldwide Persistence...	... what happens?
On Enabled	Your location will be moved if you complete a charter flight, and you will be required to depart from that location next.
Off Disabled	You can depart from any airfield in the Charter module.

Charter Bid Lockout

When WWP is enabled and you have a bid in Cargo or Scheduled (excludes Events and Tours), you will be unable to create a charter flight. You will need to either remove those bids and/or finish them. You can only have **one** Worldwide Persistence-enabled bid at a time in Cargo, Charter, or Scheduled.
